

The ASTA Group, headquartered in Oed, Lower Austria, has evolved into a globally operating company since its establishment in 1814. With currently six locations in Austria, Bosnia, Brazil, India, and China, ASTA employs 1,400 employees and is an Austrian hidden champion, manufacturing tailor-made copper components for high-performance generators and transformers, the e-mobility sector, and special applications. In the fiscal year 2022, the ASTA Group generated a revenue of 480 million euros. With over 200 years of experience and expertise in the production and advancement of precise insulated twisted flat wires, as well as special copper components using state-of-the-art manufacturing technologies, ASTA is a partner to leading energy technology manufacturers worldwide, such as ABB, Andritz AG, Hitachi, Mitsubishi, and Siemens Energy.

Sustainability is deeply embedded in ASTA's corporate strategy, and the group takes a pioneering role in the industry with its in-house copper recycling capability. Since 2022, the company, in collaboration with partners, has been developing a circular economy and actively shaping the global energy transition in a resource-efficient, energy-efficient, and ecologically sustainable manner, striving for the best possible ecological footprint.
